Professional Summary

Data Science graduate with hands-on experience across machine learning, LLM applications and Azure data engineering, from modeling on medical imaging data to demand forecasting over 541K+ retail transactions and Azure pipelines with data-quality checks. Comfortable taking a problem from raw data to a working model or dashboard. Seeking Data Scientist, Data Analyst and AI Engineer roles.

Education

Heritage Institute of Technology, Kolkata

B.Tech in Computer Science and Engineering, Data Science | CGPA: 8.50/10

Oct 2022 – Jun 2026

Kolkata, India

Experience

Cognizant

AIA Azure Intern

Jan 2026 – Apr 2026

Chennai, India

- Built and tested Azure Data Factory pipelines to ingest JSON, CSV and XML data across 5 data domains, using parameterized ingestion and Mapping Data Flows across Bronze, Silver, Staging and Gold layers.
- Implemented data cleansing, validation, timestamp parsing, deduplication, data-quality quarantine and Slowly Changing Dimensions (SCD) Type 2 historization, producing 8 Gold-layer dimension/fact outputs and passing 55 documented unit tests before export to ADLS Gen2.

CollegeTips

Data Analyst Intern

Jun 2025 – Jul 2025

Remote

- Cleaned and standardized 15+ campaign datasets in Excel using PivotTables and lookup functions, handling missing values, duplicates and inconsistent formats to produce analysis-ready data for the marketing team.
- Built 10+ Power BI and Excel dashboards tracking campaign performance, engagement and channel-level trends, enabling the marketing team to compare campaigns and support performance reporting.

Jadavpur University

Machine Learning Intern

Jun 2024 – Oct 2024

Kolkata, India

- Developed XGBoost classifiers for three Alzheimer's disease stage classification tasks using 367 MRI scans from the Alzheimer's Disease Neuroimaging Initiative (ADNI), applying z-test based feature selection.
- Evaluated models using an 80:20 train-test split with 5-fold cross-validation, reporting mean accuracies of 94.58%, 85.97% and 86.60% for HC vs EMCI, EMCI vs LMCI and LMCI vs AD, respectively.

Projects

JobShield: AI Job & Resume Analyzer | *Python, Streamlit, Groq, GPT-OSS, PyPDF, python-docx* | [GitHub](#)

- Built a Streamlit job-analysis assistant that parses PDF/DOCX resumes, extracts structured candidate information and analyzes resume-to-job alignment with recruitment-risk signals.
- Tested 40+ resume-job scenarios across legitimate and high-risk postings, correctly flagging 38 of 42 high-risk cases while generating 2 false positives across 20 legitimate postings.

ExamSeat: Intelligent Exam Seating Arrangement System | *React, Flask, SQLite, Gemini, OpenPyXL* | [GitHub](#)

- Built a full-stack exam seating and invigilator assignment system using React and Flask, tested with 500+ students across 8 departments and 15+ rooms, with automated allocation, exam records and formatted Excel reporting.
- Implemented a 3-phase greedy seating algorithm with department constraints, alternating layouts, conflict prevention and invigilator load balancing; integrated Gemini 2.5 Flash for natural-language rules and JWT-based role access control.

StockSense: Retail Demand Forecasting Pipeline | *Python, XGBoost, Pandas, Streamlit, Time Series* | [GitHub](#)

- Built an SKU-level demand forecasting pipeline from 541K+ retail transactions, transforming data into 1.07M SKU-day records across 3,936 SKUs through time-series feature engineering and chronological validation.
- Tuned XGBoost to 8.52 MAE / 34.75 RMSE, improving over a 7-day moving-average baseline of 9.55 / 37.12, and connected forecasts to reorder points, safety stock and inventory-risk actions.

Technical Skills

Programming: Python, SQL

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, Feature Engineering, Cross-Validation

GenAI: Large Language Models (LLMs), GPT-OSS, Groq, Gemini

Data & Cloud: Azure Data Factory, Azure Data Lake Storage Gen2, Azure SQL, Power BI, Excel

Development: Flask, Streamlit, React, REST APIs, SQLite, SQLAlchemy, Git
