Education

Heritage Institute Of Technology, Kolkata

B.Tech in Computer Science (Data Science) | CGPA: 8.50/10

Oct 2022 – Jun 2026

Kolkata, India

Experience

Cognizant

Jan 2026 – Apr 2026

AIA Azure Intern

Chennai, India

- Designed and implemented an end-to-end data pipeline using Azure Data Factory (ADF) following Medallion Architecture (Bronze → Silver → Gold), integrating data from multiple sources (JSON, CSV, XML) into Azure Data Lake Storage Gen2 and Azure SQL Database for scalable analytics.
- Developed ADF Mapping Data Flows and SQL stored procedures to perform data cleansing, validation, SCD Type 2 historization, and fact table loading, ensuring zero data loss (Silver + Quarantine = Bronze) and enabling accurate analytical reporting.

CollegeTips

Jun 2025 – Jul 2025

Data Analyst Intern

Remote

- Cleaned and structured 15+ datasets that reduced the time of analysis by approximately 30% with attention to detail.
- Designed more than 10 dashboards and visualizations, cut campaign planning time by 25% and provide insights.

Jadavpur University

Jun 2024 – Oct 2024

Machine Learning Intern

Kolkata, India

- Built an XGBoost-based classification model for early detection of cognitive impairment, achieving 90–95% accuracy and improving prediction performance by 15–20% over baseline models.
- Reached dimensionality reduction of features by 59% with verification of model stability on 10-fold cross-validation.

Projects

AI-Powered Route Optimizer | React, Python Flask, Google OR-Tools, Gemini AI | GitHub

Oct 2025

- Developed a full-stack logistics web application using React and Python Flask, implementing Google OR-Tools to solve complex Vehicle Routing Problems (VRP) with capacity constraints.
- Embedded Google Gemini AI to create a conversational assistant capable of providing dispatchers with dynamic route refinements and real-time situation management.

RAG-Powered Multi-Agent Q&A Assistant | Python, LangChain, Llama 3, Vector DBs | GitHub

Dec 2025

- Developed an interactive knowledge assistant utilizing Retrieval-Augmented Generation (RAG) workflows with LangChain and the Groq API.
- Integrated FAISS vector databases to enable efficient semantic search and configured intelligent query routing to handle and respond to complex user prompts.

Full-Stack Exam Seating System | React, Python, SQL | GitHub

Feb 2026

- Architected a full-stack CRUD web application to automate student seating allocations, managing complex spatial constraints using a React frontend and Python backend.
- Designed a relational database schema and integrated secure REST APIs to ensure seamless client-server data synchronization and rapid query performance.

Technical Skills

Programming: Python, PySpark, R, SQL

Technologies and Tools: Scikit-Learn, Pytorch, TensorFlow, Azure, AWS, LangChain, LangGraph, Power BI, Excel

Leadership / Extracurricular

Technical Lead — Tech Club

2023 – Present

Heritage Institute of Technology

Kolkata, India

Media Analyst Lead — InsightHub Magazine

2024 – Present

Heritage Institute of Technology

Kolkata, India
